

Appeal for supporting student's education during Corona outbreak

Dear Sir/Madam,

While corona virus outbreak intensified, the schools were closed down as per the order of Government as part of social distancing policy for the slow transmission of the virus. However these closure of schools, has affected the education of children. It is very much pertinent that the closure of schools is likely to widen the learning gap among children. While many schools in consultation with parents have continued online classes using technology and internet to keep their kids learning at home. However many institutions lacking such facilities are still unable to access such facilities for their students. The lack of android phone at every household is another bottleneck. As per the present situation, there is an uncertainty when schools will reopen. Closure of schools may protect the school children from coronavirus but the impact on them is going to be detrimental. Children are losing out on their daily interactions with their schoolmates and teachers. Learning is certainly disrupted, more so for children whose parents are not literate, or who do not have access to internet-based learning.

You may be aware that NYSASDRI residential School at Hukumtola, has been imparting primary education to a total 220 students out of them 120 students are staying in the hostel. In accordance with the Govt's circular the school is closed since third week of March'20 and students have been sent back to their homes. Lacking the basic infrastructure for online classes the school functionaries are detached from their students. They had been hopeful to retain children's buzzing movements inside campus after every phase of lock down period. But extension of lock down phases seemed to be detrimental both for school and students.

Hence in this connection we request your esteemed agency for generous support of the following equipment/devices in order to revive online education to our students.

LED TV

Laptop

Devices for high speed internet connectivity

We have pursued with the parents for availing android phones and in this connection we got consent from more than 95% parents. Your kind gesture of the assets will be used for student's education even in post lock down phase

Thank you in advance for your benevolent support.

Regards,

School Management Committee

NYSASDRI School, Hukumtola.
